Challenger Fuel Regions

Challenger's Zero Base Fuel Recovery Program offers our customers more accurate estimates of the fuel costs for their freight. Updated weekly and tailored to specific regional routes, this fuel cost model provides up to date, regionally structured estimates of fuel expenses, with calculated rates beneficial to both Challenger and our valued customers.

Available Routes

Origin and Destination regions are interchangeable

Routes with “*” have Heavy Load services available

Winter Rate “W” is the seasonal pricing tier for Winter Fuel Recovery Adjustments

Please visit our website www.challenger.com/fuelrecovery to see up to date pricing for the listed regional routes, and learn more about this program. Fuel prices will be posted every Wednesday by midnight (Eastern Time) and will be effective Thursday each week. You can subscribe to our weekly email updates of Challenger's Zero Base Fuel Recovery Program by contacting traffic@challenger.com.

A **heavy load** is a specialized service that is available on some of Challenger's routes and can carry more weight than a tandem load (Tri-axle or Quad services, where applicable).

Generally, Winter Effect contributes to an 8% - 15% reduction in MPG efficiency. Effective November 1st to March 31st, **Winter Fuel Recovery Adjustments** are only intended to cover the changing fuel needs during the months of reduced fuel economy. As not every route will experience the same severity of winter conditions, our Winter Fuel Recovery Adjustments are a tiered system.

The 3 tiers are as follows:

Canadian Currency (CAN)	U.S. Currency (USD)
W1: 9 cents per mile	W1: 8 cents per mile
W2: 8 cents per mile	W2: 7 cents per mile
W3: 7 cents per mile	W3: 6 cents per mile

Notes:

- If you have any questions or concerns, or to find out how these rates are calculated, go to www.challenger.com/fuelrecovery/definitions or contact us at traffic@challenger.com or 1-800-265-6358.
- Fuel rates are subject to change without notice.
